

Industrial Ventilation Services

Temporary Heating, Ventilation and Air
Conditioning for Confined Spaces &
Industrial Work Areas

Introduction

Aerotek Equipment is an Alberta based company that has been supplying custom air movement solutions for industrial applications since 1991.

We work with clients to provide temporary ventilation systems for confined spaces and industrial work areas. Our solutions keep workers safe and comfortable for increased productivity and efficiency on every job. Ventilation systems are customized to meet the demands of every environment such as tanks, vessels, boilers and more.

Aerotek specializes in:

Supply & Exhaust Air Systems

Air Conditioning

- Heating
- Cooling
- Dehumidification

Air Quality Control

- Filtration
- Fume Extraction
- Dust Collection

Temporary HVAC

Custom ventilation systems.

Health and Safety

We work closely with your HSE team to ensure ventilation systems meet every site's requirements for air movement. Every system is implemented in accordance with regional OH&S codes to ensure worker safety.

Design

Systems are designed and engineered using state of the art flow analysis software and the most robust materials for industrial environments. Each temporary HVAC system is designed to achieve specific air change and velocity capture requirements.

Custom components. Improved access to confined spaces.

Equipment

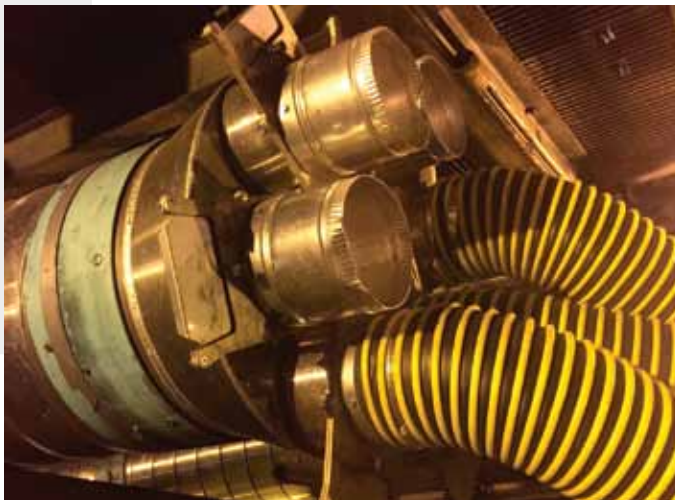

Quick fit ducting for rapid setup and tear down.

Aerotek offers a broad line of HVAC equipment to provide the performance and comfort for every project.

We offer complete temporary ventilation systems for sale and rental including:

- Fans/Blowers
- Ducting
- Hoses
- Fittings
- Custom Fabricated Components
- Supports & Accessories

Fume extraction hose.

Easy access portable equipment.

Turnaround/Outage Planning Operations Support

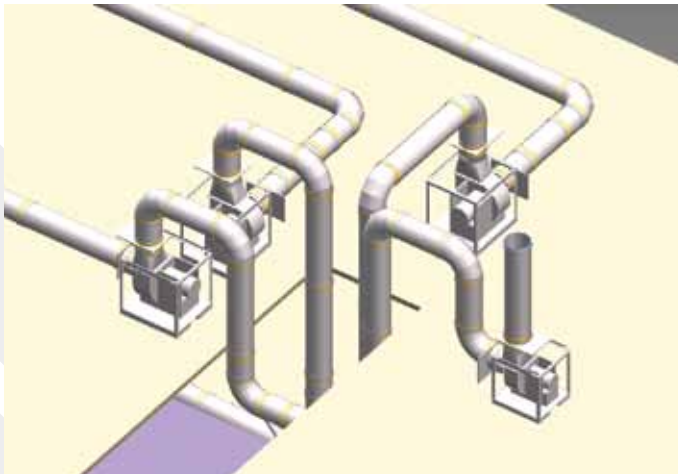

Aerotek is here to support your shutdown. We serve to increase the efficiency of outages at all stages and reduce costly downtime. We will work with your maintenance and scheduling teams to ensure ventilation is in place where you need it, when you need it.

Our ventilation technicians are on site to install, modify and maintain equipment to meet your every need. We perform immediate troubleshooting to keep systems operational.

Drafting

We offer ventilation planning drawings so equipment routing may be predetermined for best access and avoid interference with neighbouring work activities. We utilize the most current drafting software to create 3D and 2D drawings to support your maintenance and turnaround planning.

Ventilation planning drawings.
